

5. An assembly according to [any one of claims 1 or 2] claim 1, characterized in that the electric starter motor (3) has power ranging from 5 HP to 15 HP.

7. An assembly according to [any one of claims 1, 2, 5, or 6] claim 1, characterized in that the main electric motor (2) has power of approximately 50 HP.

8. An assembly according to [any one of claims 1 – 7] claim 1, characterized in that the electric starter motor (3) is coupled to the main electric motor (2) by means of a rotation axle (4).

9. An assembly according to [any one of claim 1 – 7] claim 1, characterized in that the electric starter motor is coupled to the main electric motor by means of a pulley.

10. An assembly according to [any one of claims 1 – 7] claim 1, characterized in that the electric starter motor is coupled to the main electric motor by means of a gear.

16. A method according to [any one of claims 11 – 15] claim 11, characterized in that the main electric motor is actuated just before reaching the nominal rotation.

17. A method according to [any one of claims 11 – 15] claim 11, characterized in that the main electric motor is actuated right after reaching the nominal rotation.
